DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims are rejected under 35 U.S.C. 102(b) as being anticipated by Myers (4,728,416).

Please see the previous rejection sent out on September 8, 2004.

Response to Arguments

The argument that the Myers reference is silent with respect to sulfur reduction and fails to teach a process to reduce the sulfur content of liquid products produced during a FCC process is not persuasive. As it is well known in a cracking process, a hydrocarbon feed is cracked to a smaller hydrocarbon. Therefore, some of organosulfur compounds would be decomposed in the cracking process to produce hydrogen sulfide in the cracking process. It is inherently that the liquid product (e.g., gasoline) of Myers has a reduced sulfur content. In fact, Myers teaches that the recycled water comprises hydrogen sulfide (H₂S). This proves that organosulfur compounds are decomposed during the cracking process. See col. 19, lines 20-30

The argument that it is believed that Myers at col. 8, lines 10-30 actually teaches away from Applications' invention by teaching that sulfur may actually be desired in the Myers process to maintain metals such Ni, V, Cu and Fe in the sulfide form in the reactor during the

Art Unit: 1764

FCC process is not persuasive because Myers desires to use a feedstock comprising some amount of sulfur to maintain metal in the sulfide form. This teaching is known in the art to maintain the stability of the catalyst when using a feed comprising sulfur compounds. However, Myer does not desire to produce a liquid product comprising sulfur compounds.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
